

Store Pickup GraphQL

FEATURES

- The Store Pickup module offers GraphQL to efficiently manage and display Pickup Store on websites.

How to install the extension

1. Upload via ZIP/Archive

- Back up your store's database and web directory
 - Download the extension zip file and extract the zip file
 - Transfer the **app** folder to the **Magento2 root** directory on the server
 - Enable maintenance mode **php bin/magento maintenance:enable**
 - Run the command **php bin/magento module:enable MageINIC_Core MageINIC_StorePickupGraphQL**
 - Run the command **php bin/magento setup:upgrade** to install the extension
 - Run the command **php bin/magento cache:clean** to clean the cache
 - Disable maintenance mode **php bin/magento maintenance:disable**
 - Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.
-

Store Configuration

- Please include the following query in the body section to fetch the module store configuration values.

End Point : {{baseurl}}/graphql

Method: POST

Request:

```
{
  storeConfig {
    store_pickup_default_radius
    store_pickup_enable
    store_pickup_frontend_url
    store_pickup_google_api
    store_pickup_length_option
    store_pickup_max_radius
    store_pickup_meta_description
    store_pickup_meta_keywords
    store_pickup_meta_title
    store_pickup_store_link_title
    store_pickup_store_link_location
  }
}
```

Response :

```
{
  "data": {
    "storeConfig": {
      "store_pickup_default_radius": "100",
      "store_pickup_enable": true,
      "store_pickup_frontend_url": "pickupstore",
      "store_pickup_google_api": "AlzaSyBnWQ8h_I3k6WN5j7ysscB6HEahWd193fE",
      "store_pickup_length_option": "km",
      "store_pickup_max_radius": "100",
      "store_pickup_meta_description": null,
      "store_pickup_meta_keywords": null,
      "store_pickup_meta_title": "Store Pickup",
      "store_pickup_store_link_title": "Store Pickup",
      "store_pickup_store_link_location": "navigation"
    }
  }
}
```

You receive store configuration data set on the backend, including:

- **store_pickup_enable** - Enable the store Pickup module functionality in the Website via the Yes/No option.
 - **store_pickup_frontend_url** - Store pickup listing url identifier.
 - **store_pickup_store_link_title** - Store pickup listing Link title.
 - **store_pickup_store_link_location** - Store pickup listing Link location.
 - **store_pickup_meta_title** - Store pickup listing Meta title.
 - **store_pickup_meta_keywords** - Store pickup listing Meta keywords.
 - **store_pickup_meta_description** - Store pickup listing Meta description.
 - **store_pickup_google_api** - Google map api.
 - **store_pickup_default_radius** - Google Map default radius.
 - **store_pickup_max_radius** - Google Map max radius
 - **store_pickup_length_option** - Google Map radius length kilometer/mile.
-

Store Pickup GraphQL Query

Store Pickup Filtered List

- To implement store-specific Store Pickup filtering, it is essential to configure the Header with the **Key**: "Store" and **Value**: "Default" (using your Store Code). This setup ensures effective segregation of Store Pickup based on individual store contexts.

Request:

```
{
  StorePickupList(
    filter: {}
    pageSize: 6
    currentPage: 1
  ){
    storePickupList {
      address
      city
      contact_no
      content
      website
      country_id
      created_at
      email
      entity_id
      holiday_ids
      image
      latitude
      longitude
      meta_description
      meta_keywords
      meta_title
      name
      region
      schedule
      state_id
      url
      updated_at
      postcode
    }
    total_count
    total_pages
  }
}
```

Response :

```
{
  "data": {
    "StorePickupList": {
      "storePickupList": [
        {
          "address": "5000 Meadowood Mall Cir",
          "city": "Reno",
          "contact_no": "7759081489",
          "content": "<p>Department stores & smaller brand-name shops plus a
food court offered in comfortable surrounds.</p>",

```

Store Pickup Field description

is_active - Enable the Store Pickup in the slider via the Yes/No option

name - Add the Store Name.

email - Add the Email Address of the Store Pickup.

image - Upload the Store Pickup image.

position - Set Store Pickup Position on the listing page.

store_id - Select Store View for the current Store Pickup.

content - Add Store Pickup Content.

website - Add the Website URL of the Store Pickup

address - Add Address.

country - Select a Country.

state_id - Add a state ID.

region - Add a Region

city - Add a City.

postcode: Add Zip/Postal Code.

contact_no - Add a Phone Number.

url - store pickup detail page URL.

schedule - Add a Pickup store Schedule.

latitude - Add a Latitude.

longitude - Add a Longitude.

identifier - Set a unique Identifier for a particular store pickup or it will autogenerate on save.

meta_title - Set a Meta Title.

meta_keywords - Add a Meta Keywords.

meta_description - Add a Meta description.

Store Holiday Filtered List

Request:

```
{
  HolidayList(
    filter: {},
    pageSize: 6,
    currentPage: 1
  ) {
    holiday list {
      description
      from_date
      holiday_id
      name
      to_date
    }
    total_count
    total_pages
  }
}
```

Response :

```
{
  "data": {
    "HolidayList": {
      "holidayList": [
        {
          "name": "Christmas",
          "status": true,
          "from_date": "2023-12-25",
          "to_date": "2023-12-31",
          "description": "<p>Christmas Holidays.</p>"
        }
      ],
      "total_count": 1,
      "total_pages": 1
    }
  }
}
```

Store Pickup Field description

id - Holiday ID

name - Add the holiday Name.

status - Holiday Enable disable status.

from_date - holiday start from date.

to_date - Holidays end to date.

description - Add Holiday description.
